International application No

PCT/US04/40038

Box No. 1 Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of:

- ☒ the international application in the language in which it was filed
- ☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.
- ☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

Form PCT/ISA/237(Box No. 1) (April 2003)

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US04/40038

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>3,5-15 and 18-21</u>	YES
	Claims <u>1-7 and 16, 17</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-21</u>	NO
Industrial applicability (IA)	Claims <u>1-21</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1-7, and 16, 17 lack novelty under PCT Article 33(2) as being anticipated by US 5,866,168 ('168). '168 teaches a method of treating acne and rosacea and removing scars with salts of zinc, manganese, and barium, in an amount of 0.5% to 8% (See the abstract, col. 3, lines 18-19, also claims 1-9)

Claims 1-12, 14-16, 19-21 lack an inventive step under PCT Article 33(3) as being obvious over Remington's Pharmaceutical Sciences, 18th ed., 1990, page 768 (Remington).

Remington teaches salicylic acid as useful in treating warts, 16.7-17%, and acne, 2% (see col. 1). Remington does not expressly teach the specific salicylate salts herein claimed to be used in the method of treating warts and acne. It would have been obvious to one of ordinary skill in the art at the time of invention to employ the salt of salicylic acid in the method of treating warts and acne.

One of ordinary skill in the art would have been motivated to employ the salt of salicylic acid in the method of treating warts and acne since the use of the salt of the active agents renders the use of the active agents itself obvious. Furthermore, formulating the salicylate compounds into various conventional topical dosage forms is obvious as being within the purview of skilled artisan.

Claims 1, 2, 4, 9, 13, 18 lack an inventive step under PCT Article 33(3) as being obvious over US 4,995,591 ('591). '591 teaches it is known in the century that chromium, zinc, and copper, among other metallic salts as old and well-known for the treatment of warts (See col. 1, lines 59-68).

'591 does not expressly teach the dosage of the metallic salt compounds. It would have been obvious to one of ordinary skill in the art at the time of invention to employ the chromium, zinc, and/or copper salt, in an effective dosage, in a method of treating warts.

One of ordinary skill in the art would have been motivated to employ the chromium, zinc, and/or copper salt, in an effective dosage, in a method of treating warts. It is well-known that various metallic salts as useful and effective in treating warts. The optimization of result effect parameters (e.g., dosage range and dosing regimens) is obvious as being within the skill of the artisan.

Claims 1-21 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
